## PROJECTS

**Moving Forward Leadership Podcast** - HTML/CSS, Javascript, Bootstrap, PHP, WordPress, Responsive Design (2017)

https://movingforwardleadership.com

Led Prototyping, and wireframing then designed and developed the front-end of this website for a client who wanted a website rebuild featuring a robust CMS with clean, modern design and additional features like in-line media and widgets linked to his medium blog page.

**Trending Words of Reddit** - AJAX, APIs, JSON, Javascript, HandlebarsJS, jQuery, Bulma, SQL, MVC Structure, Responsive Design, Git (2017)

https://trendingwordsofreddit.herokuapp.com/

Collaborated with 3 other students in a Code Fellows 301 class to build this tool in 4.5 days which analyzes a top 25 subreddit from reddit of choice using a Natural Language Processor API and renders a wordcloud based on the post titles.

**GhosTown** - HTML/CSS, Vanilla Javascript, MVC Structure, Git (2017)

https://ghostowngame.com

Worked with 2 other students to build this text-based choose your own adventure game from scratch in 4.5 days using vanilla Javascript, HTML and CSS.

**Rainier Watch** - Social Media, Web Design, Branding, Marketing, Entrepreneurship (2014 - PRESENT)

https://rainierwatch.com

Founded and have organically grown an online community of 3,500+ people who update the community when Mount Rainier is visible.

**Corn, Beans & Betas** - Web Design, WordPress, SEO (2016)

https://cornbeansbetas.com

Built and then consulted on the design of a self-hosted WordPress blog featuring Iowa economic research and forecasts.
